(Special Issue on Arc Magmatism and Evolution of a Habitable Environment on Earth)

CONTENTS

| | |
|---|----------|
| Volatile cycling and evolution of habitable environment on Earth | |
| Ji WQ and Wu FY | (1285) |
| From carbon source to carbon sink: Influences of magmatism and erosion in continental arcs on long-term carbon cycle | |
| Jiang HH | (1302) |
| Advances of driving mechanisms of the Early Eocene Climatic Optimum (EECO): Constraints from the Linzizong volcanic rocks in southern Tibet | |
| Zhang SH, Ji WQ and Chen HB | (1313) |
| Decarbonation in contact metamorphism | |
| Chu X and Zhou ZH | (1328) |
| Geochemical behavior and recycling of sulfur in subduction zones | |
| Li JL, Gao J, Huang GF, Ma ZP and Wang XS | (1345) |
| Degassing and environmental effect of intracontinental transcrustal magmatic system | |
| Jiang CH, Du DH and Wang XL | (1360) |
| Super-eruptions and their environmental impacts | |
| Liu PP, Xue ZR, Wang DB, Tian W, Zhang XR and Guo ZF | (1375) |
| The effect of the deep carbon cycle on environment and climate | |
| Zong KQ, He DT, Chen CF, Chen W, Yu KZ and Liu YS | (1389) |
| Magma dynamics in the crust and its resource and environmental effects | |
| Zhou JS and Wang Q | (1399) |
| Volcanological evolution and paleoenvironment of the Late Cretaceous Changyu volcano in the coastal SE China | |
| He ZY, Yan LL, Chu PL, Xiang H and Jiang ZK | (1419) |
| Phanerozoic magmatism and ocean-continent framework of northeastern China and their relationship with climate change | |
| Yang H, Ge WC, Ji Z, Jing JH, Dong Y and Jing Y | (1443) |
| The role of volatile in the evolution of high silicic magma: Insights from the Late Cretaceous granitoids in the coastal area of southeastern China | |
| Chen JY, Yang JH, Zhang JH, Zhou XB and Yang ZG | (1460) |
| Dynamic mechanisms of the evolution of crustal silicic magmas | |
| Zhang JH, Zheng XX, Sun JF, Chen JY and Yang JH | (1481) |
| The principles of diffusion chronometry and applications in magmatic systems | |
| Chen HB, Ji WQ and Zhang SH | (1499) |
| Tracking volatile cycling in subduction zones using metal stable isotopes | |
| Liu SA | (1512) |
| Carbon releasing mechanisms and flux estimation in subducting slabs: Problems and progress | |
| Lan CY, Tao RB, Zhang LF and Guo S | (1523) |
| Fluxes and genesis of deep carbon emissions from southern Tibetan Plateau and its adjacent regions | |
| Zhao WB, Guo ZF, Li JJ, Ma L and Liu JQ | (1541) |
| Pathways of carbon emissions to atmosphere due to skarnification | |
| Liu W, Wan B and Yan SC | (1557) |
